

A woman with dark hair is smiling and hugging a large white pillow. She is wearing a white top. The background is a plain, light-colored wall.

It's love at first night.

Love your pillow even more with the new Kenko Naturest® Custom Pillowcase. Nikken Negative-Ion and Far-Infrared Technologies make sleep more relaxing and provide warm and cool temperature regulation that's always just right.

Kenko Naturest®
Custom Pillowcase

Exclusively from Nikken

Quick Reference Flyer

Complete your Kenko Sleep System with the Naturest Custom Pillowcase. Designed to fit standard-size pillows and the Naturest Custom Pillow, the Custom Pillowcase releases soothing negative ions, and Nikken Far-Infrared Technology provides ideal temperature regulation. The Naturest Custom Pillowcase is finished in the same pattern as used in Nikken Kenko Dream and Kenko Dream Light Comforters, for a stylish matched look.

Far-Infrared Technology helps avoid “hot pillow”

- Special fibers absorb ambient energy and reflect it only in the far-infrared range
- This provides a gentle warming effect on cold nights
- Excess heat is released, to keep the pillow surface cool when the weather is warm

Negative-Ion Technology creates a feeling of outdoor freshness

- The surface produces a gentle flow of negative ions, charged oxygen atoms or molecules
- High amounts of these ions are found in forests and near waterfalls
- The relaxing and refreshing atmosphere is ideal for sleep

Comfortable and long-wearing

- Cotton surface and rayon lining combine softness and durability
- Far-Infrared and Negative-Ion filler also adds cushioning
- Chitosan insert is naturally bacteriostatic
- Zipper closure and washable fabric for easy care

Elegant dobby weave pattern

- Helps retain filler in place
- Matches Kenko comforters for a coordinated look

Item code
Single #1175
Pair #1176
